Technologies and features.

Foreign Object Damage

STAHLWILLE protects against foreign object damage. The preferred choice in safety-relevant fields such as aerospace, thanks to the screwless design.

QuickRelease

The QuickRelease technology ensures tools cannot be inadvertently lost – while enabling rapid, safe tool changes.

Fine tooth ratchet mechanisms.

STAHLWILLE fine tooth ratchets have a specially developed, perfectly balanced mechanism with 80 teeth, ensuring maximum load capacity and, at the same time, excellent durability. With STAHLWILLE fine-tooth ratchets, no less than eight teeth engage at once, which provides smooth working action. The tight ratchet angle of only 4.5° enables efficient working in confined spaces.

HI-LOK™

HI-LOK™ countersunk rivet technology is highly valued in the aerospace industry, as it provides reliable connections even in safety-critical and confined environments. With our patented STAHLWILLE HI-LOK™ ratchet, the hex key merely pushes the ball lock aside. As a result, our ratchets offer the highest possible FOD prevention.
