## Product highlights.

### For tight installation spaces.

The flat design of the combination ratcheting spanner makes it easier to work in tight spaces.

### Excellent workmanship.

The spanner is made from high-quality forged chrome alloy steel, giving it outstanding robustness and durability, even in continuous and prolonged use. It also has a corrosion-resistant chrome-plated finish.

### Integrated ratchet.

Our combination ratcheting spanners have an integrated fine-toothed ratchet. You do not need to change your grip or remove and reattach the tool multiple times. The bolt can be tightened quickly and efficiently without stopping, as when using a ratchet.

### In every way.

Our combination ratcheting spanners are available in different versions (metric, imperial, angled, flat) and also as sets in roll-up pouches or TCS inserts.

### Non-slip surface.

The STAHLWILLE spanners have a high-quality surface structure with a good grip, which even allows you to work safely and securely with oily hands. The non-slip property increases handling control.

## Technologies and features.

### Double T-profile

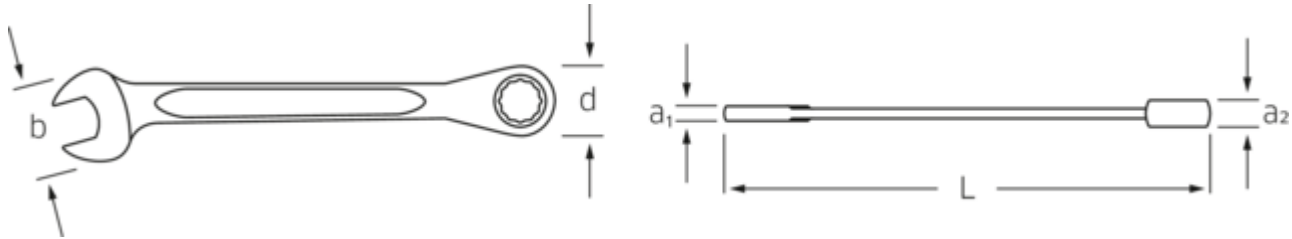

The double T-profile of the STAHLWILLE open-ended and ring spanners has a recess in the middle of the shaft. This reduces the weight of the tool and ensures safe handling. The spanners provide exceptional grip and facilitates reduced work fatigue.

### Offset Shaft Design

STAHLWILLE spanners are reinforced between the jaw and shaft, as this is where the greatest forces are exerted. The special design strengthens the stress zones, thus reducing the risk of breakage to a minimum.
